# Strive To Be An Outstanding Mould Supplier In China.

## Brief Introduction:

UPMOULD CO.,LTD.

UPMOULD CO., Ltd is the leading plastic moulds manufacturer in China, established in 1995. Since 1995, every year, UPMOULD has had great development in management, quality and turnover. Based on the precision tooling, high technology and top mental mould design, UPMOULD has established the main market in Spain, Italy, France, Portugal, Iran and the U.S.A.

UPMOULD use Pro/E, Solidworks, U.G., and Auto CAD for moulds and plastic parts design, with very strong mould designer and drawing reading ability. This ensures the good technical communications with clients, which can avoid any mistake occur.

UPMOULD creates a special and professional project management system, which is especially suitable for mould design and parts quality controlling, mould tooling and processing controlling, mould operation quality controlling...UPMOULD's whole working team absolutely trusts that good quality and services are based on good management.

UPMOULD mould tooling range: The biggest mould we can make currently is 6000kgs.

Our major: plastic crate, bin & pallet mould, plastic fork, spoon & knife mould, plastic bucket mould, plastic chair mould, plastic cap, PET preform & bottle mould, plastic baby carriage mould and plastic commodity mould. UPMOULD processes annually 1000 to 5000 sets of medium to large sizes of moulds, with a turnover of more than 10M USD in the year 2005.

UPMOULD sincerely express keen interest to invite your down visit and receive any further inquiries related to plastic mould or plastic parts cooperation.

## Mould Design

With a complete design system, UPMOULD is responsible for forward-looking research and new product development. By advanced CAD / CAE / CAM technologies, and UG, CATIA, MOLD D110W, PRO/E software, the company carries out product design optimization cost to shorten the product development cycle and ensure the quality of moulds.

## Tooling Equipments

Two-dimensional graph drawing, as a critical step in the mould making process, contains comprehensive regulations on size, performance, technical requirements of various parts of a mould, which is the basis for testing and process analysis. 3D design provides vivid and visual images that two-dimensional design fails. Three-dimensional drawings of the company are drawn by the professional technical staff. The virtual movement of products and moulds can show the performance of moulds and products during the design stage so that the performance can be improved in advance and better moulds and products can be produced; moreover, the three-dimensional drawings greatly shorten the production cycle and create incalculable economic benefits for customers.

## Mould Quality

Make complete inspection on Plastic Moulds to ensure the structure consistency and spare parts standard. Project manager and QC people should all take part in Plastic Moulds inspection under the company standard, and make sure the product quality. If mistakes are found, they can be corrected promptly. If a so can prevent mistakes. In addition, we will simultaneously do independent standardization test on Plastic Moulds cooling system, Plastic Moulds hydraulic oil channel system and hot runner system.

## Mould Service

For our customer, UPMOULD offer you as below:  
Moulding Solution:  
1. Professional advices in regard of every aspect in moulding;  
2. Workable suggestions from our qualified mechanics & electronic engineers;

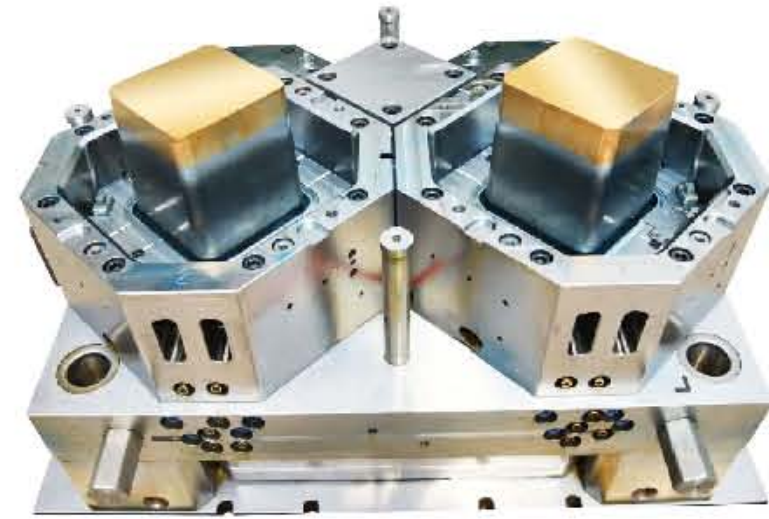

## Plastic Bucket Mould

Plastic bucket mould technical points

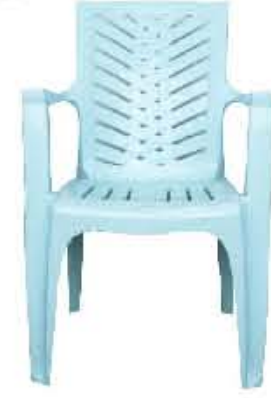

How to avoid the bucket mould core eccentric, caused the bucket wall thickness not even.

1. optimal and equal cooling effects in different area of bucket mould cavity and core.
2. the high and angle of the bucket moulds interlock system.
3. the machining process to the bucket moulds cavity and cores will cause the eccentric.

## Plastic Chair Mould

How can we order a good plastic chair mould. To order a high standard plastic chair mould, we have to select the mould company very carefully. Almost most of the mould company they can make the chair mould, but we think there is seldom of the mould companies can make a good chair mould.

Strive To Be An Outstanding  
Mould Supplier In China.

## Plastic Crate & Pallet Mould

UPMOULD is the leading crate mould manufacturer in China, we has developed various crate moulds, such like bottle crate mould, fish crate mould, vegetable crate mould, fruit crate mould, bread crate mould, industrial crate mould...

The newest technology in plastic crate mould researching, provide the highspeed plastic crate moulding method!

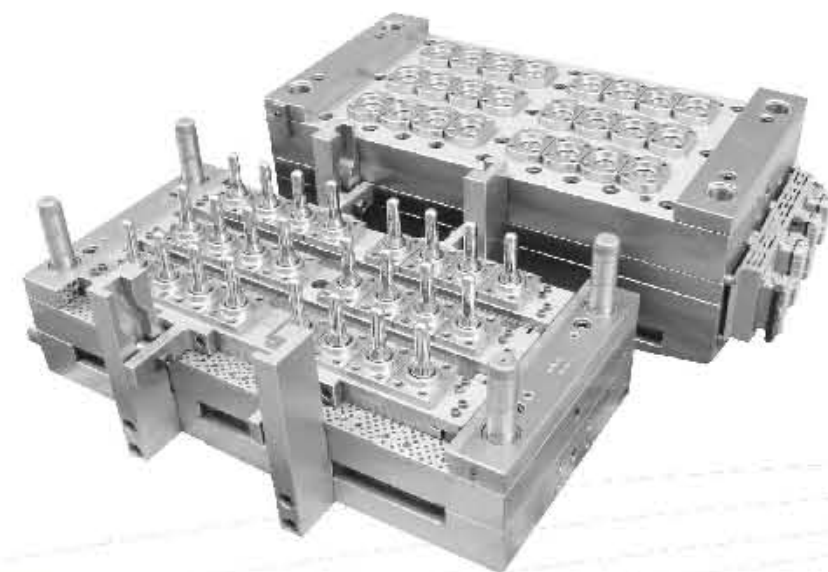

## Plastic Fork, Spoon And Knife

UPMOULD always be responsible for each mould. If you have plastic spoon, fork or knife mould or have any related project, We come to UPMOULD.

Strive To Be An Outstanding  
Mould Supplier In China.

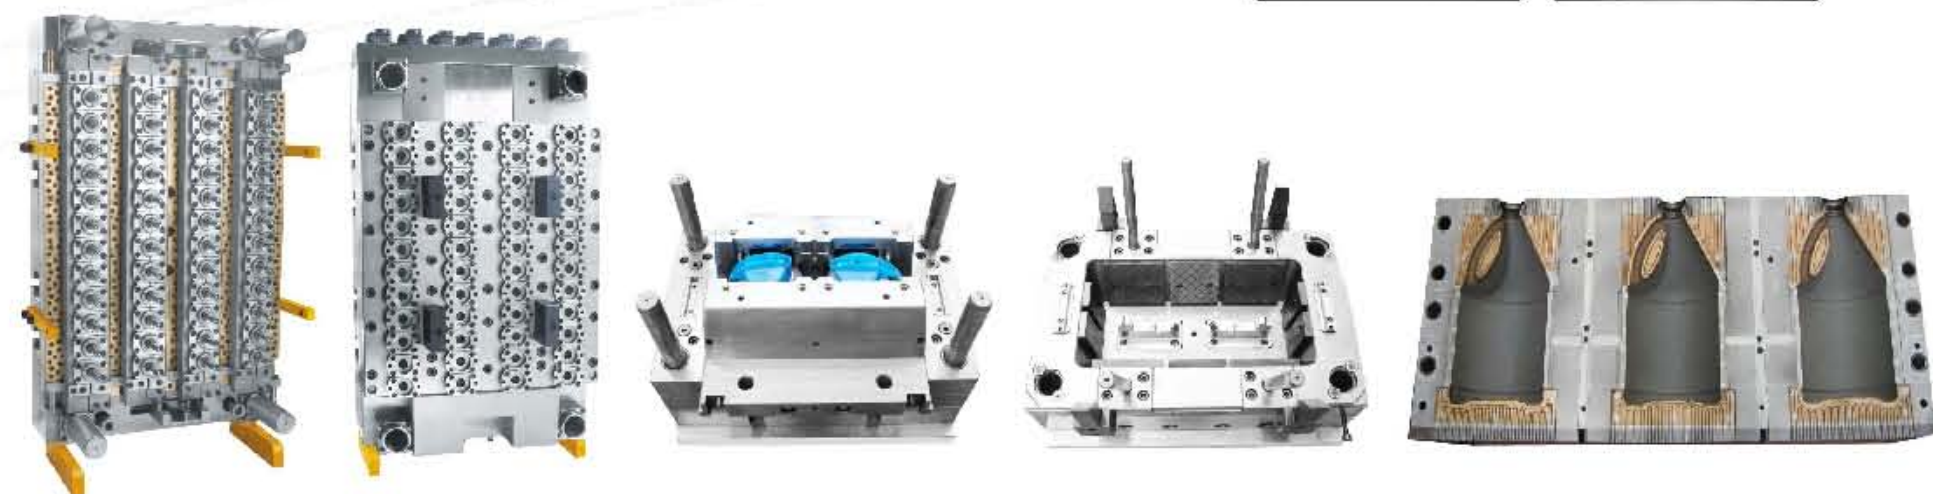

## Plastic Cap Pet Preform Bottle Mould

UPMOULD have strong ability to make plastic moulds for cap mould, PET preform mould, and bottle moulds. To choose us, it will bring you a satisfied mould and good service.

## Plastic Baby Carriage Mould

UPMOULD is a professional and experienced manufacturer of plastic baby carriage mould. With the development of our strong R&D team and our moulding equipment, we are dedicated to all your OEM orders in accordance with your demands.

Strive To Be An Outstanding  
Mould Supplier In China.

## Commodity Mould

UPMOULD is a famous mould manufacturer in China, which is specialized in making plastic commodity mould. Every year, UPMOULD will make more than 200 sets of plastic commodity mould to worldwide.

Please come UPMOULD to order a top quality and high effective production plastic commodity mould.
